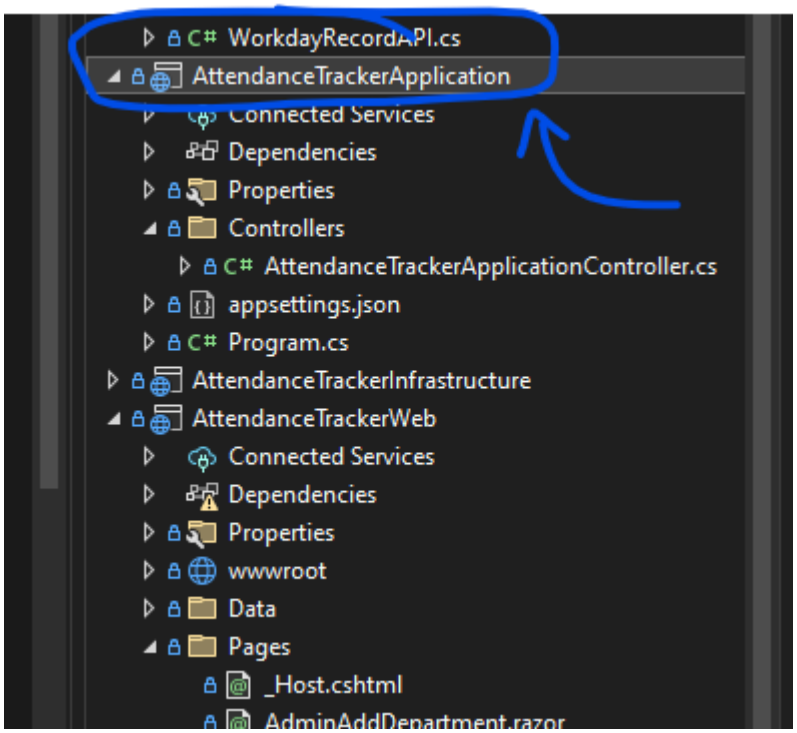
In order to proceed, one must have ResourceGroup created in Azure website.

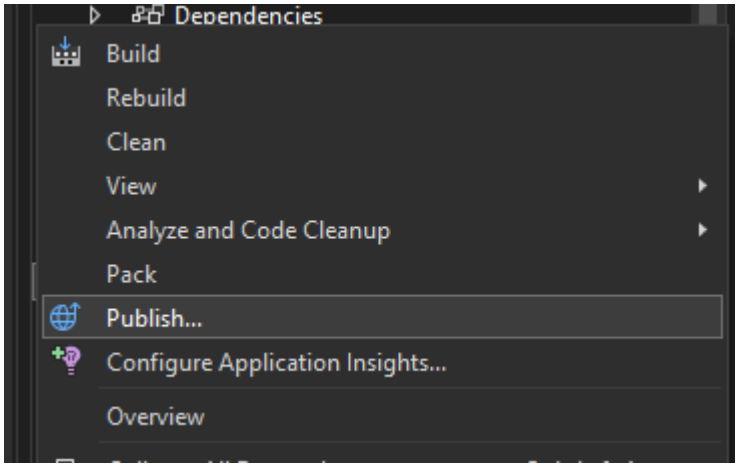
Pre-requisites:

- You will have to input your credit card information for this step and create a free azure subscription.
- For Azure database usage, you may have to select pay-as-you-go options, your personal project usually will not exceed the free amount.

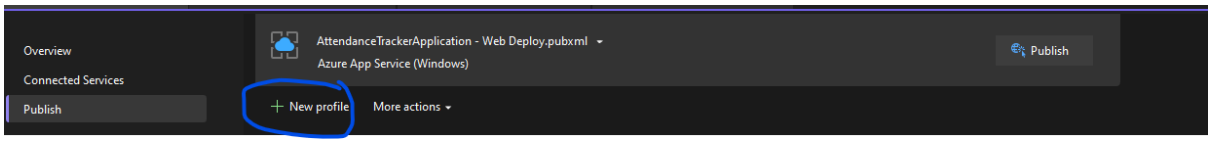
---

1. Right click on your project and select publish

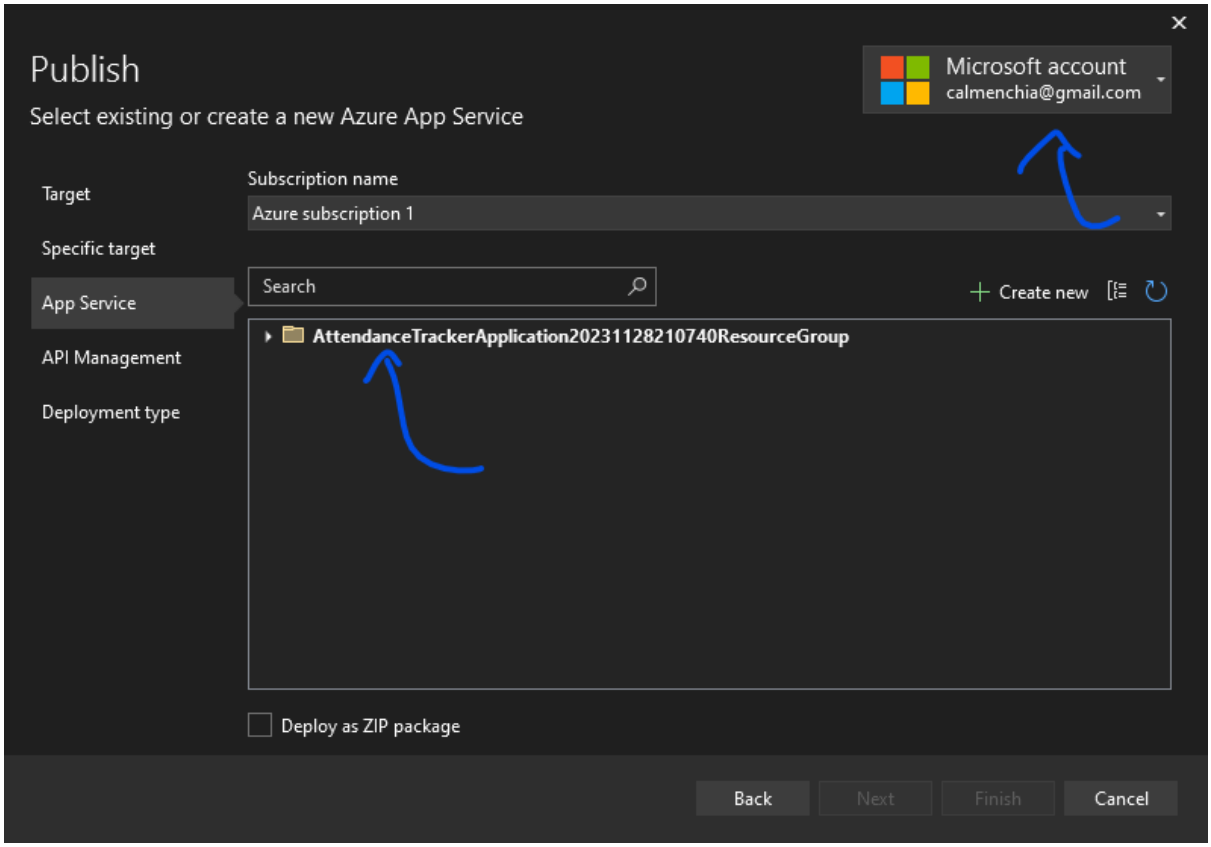




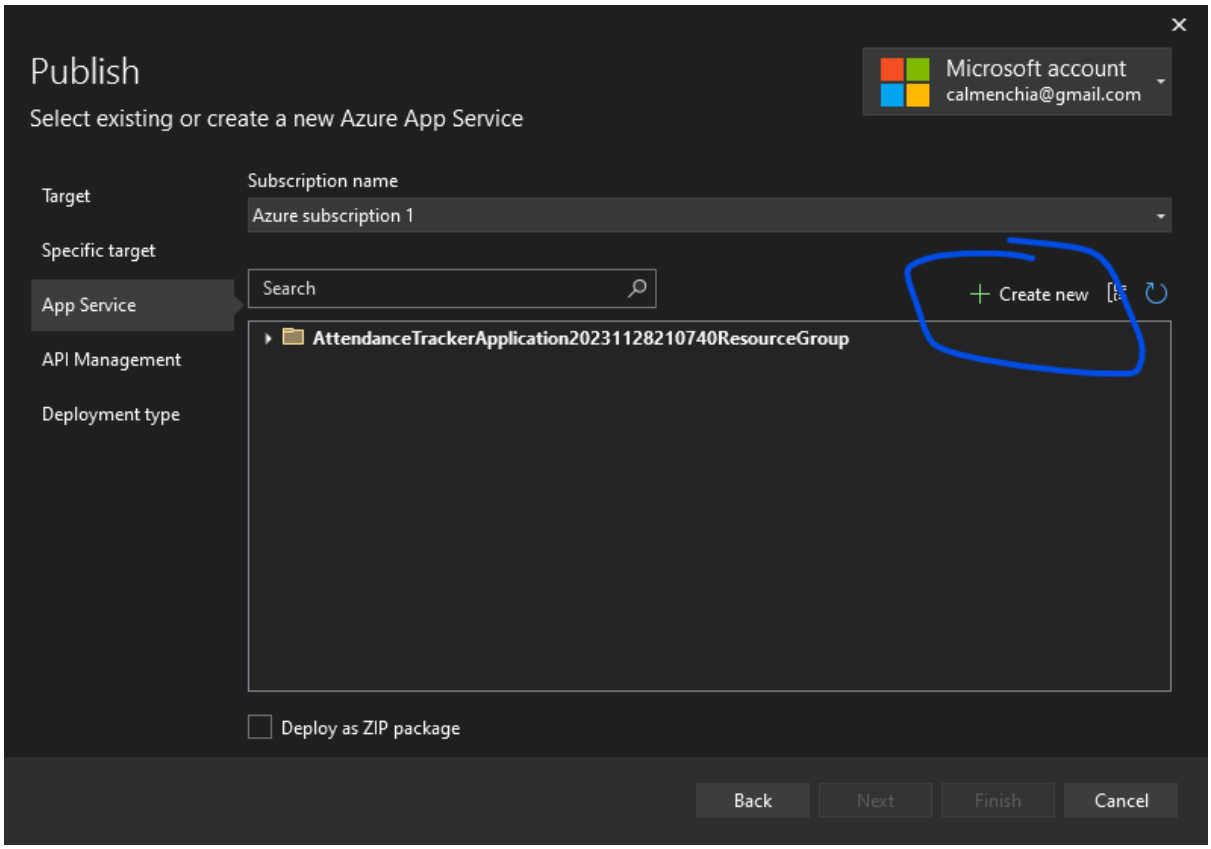
2. Then select a new profile if you haven't already



3. In the menu pops out, select Azure → Azure App Service (Windows).
4. If you have signed in to your Microsoft account where the ResourceGroup is registered, you will see it here.

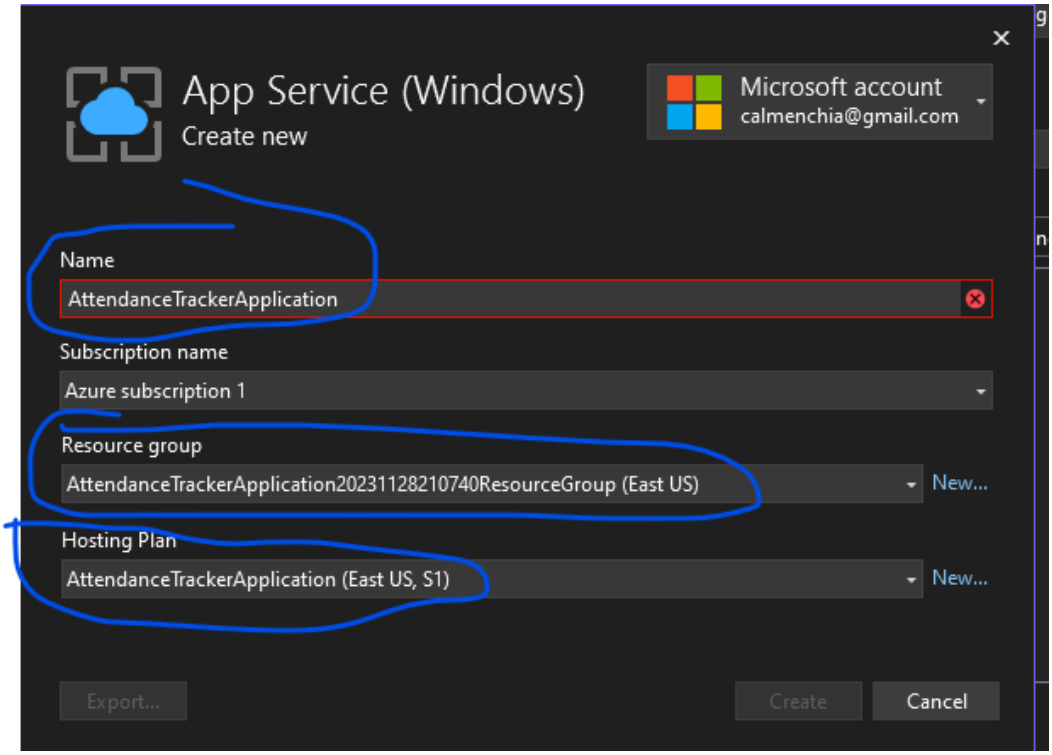


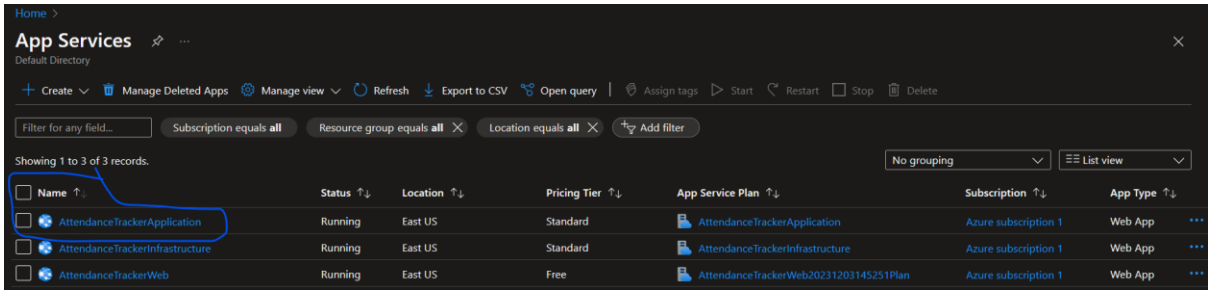
5. Then, click on Create New



6. Select the

- Name (this is what will be shown in Azure management website)
- ResourceGroup that you have registered.
- And the hosting plan accordingly





7. Click on Next and Finish the publishing.
8. Then go to Azure management portal website, login and navigate to Home → App Services. We should be able to see our newly created project being hosted now.
